Mira 40

Piccola
Agile
Robusta

Small Compact Strong

La "MIRA" è estremamente agile e piccola abbastanza per essere trasportata anche con un'utilitaria.

Piccola ma strong: telaio in acciaio inox AISI 304 con 410 mm di larghezza di lavoro.

Solo 3 litri di capacità serbatoio soluzione con però una capacità di pulizia di 100 metri quadri grazie alla funzione "eco" che gestisce la distribuzione del acqua in maniera temporizzata.

Batterie al litio ione di 13 Ah a 36 volt che permette di ottenere 1 ora di autonomia di un ora.

Macchina indispensabile per le pulizie di fondo nei locali più piccoli e pieni di ostacoli. Grazie al suo timone snodato permette di accedere sotto i tavoli, mobili, scaffali, ecc."

La Mira è stata studiata anche per applicazioni diverse dal normale uso come lavasciuga: grazie al suo tergitore che si solleva, e anche al suo peso e quindi pressione a terra, possiamo usarla per deceratura o trattamenti o lucidature proprio come una monospazzola.

Applicando diversi tipi di spazzole o dischi trascinanti, abbiamo reso questa macchina molto polivalente. Tutto questo è reso possibile grazie al sovradimensionamento dei motori che garantisce una funzionalità e un'efficacia fuori dal comune, ma soprattutto abbiamo reso variabile la velocità di rotazione delle spazzole (due spazzole contro-rotanti di 210 mm di diametro). Da 140 a 210/min."

"MIRA" is extremely small and compact that you can easily loading this machine even in a small car.

Small but strong: Stainless steel chasis inox AISI 304 and the working width is 410 mm.

Only 3 liters of solution tank capacity, however a cleaning capacity of 100 square meters thanks to "eco" function that controls the distribution of water in timed manner.

13 Ah lithium-ion battery of 36 volts that allow you to get one hour of autonomy.

Essential machine for deep cleaning in small rooms and full of obstacles. Thanks to its articulate drawbar allows access under tables, furniture, shelves, etc.

Mira is also designed for application other than normal use as a scrubber drier: thanks to its squeegee that is liftable, and also to its weight and thus pressure on the ground, we can use it to de-waxing or polishing treatments , just like a single brush machine.

Applying different types of brushes or pad holder, this machine is really polyvalent. All this is possible due to the oversizing of the motors which ensures functionality and effectiveness is uncommon, but above all we made the variable brush rotation speed.(two 210 mm diameter counter-rotating brush). From 140 to 210 rpm.

CARATTERISTICHE TECNICHE / TECHNICAL FEATURES

LARGHEZZA PISTA DI LAVAGGIO MM / WORKING WIDTH MM	410
RESA ORARIA TEORICA (PISTA LAVAGGIO X VELOCITA' maX) m2/h / CLEANING CAPACITY SQ mt/HOUR	500
ALIMENTAZIONE B=Batteria / POWER UNIT B = BATTERY	B 36 VOLT / 13 ah
DISCO DIAMETRO -- N.RO/MM / BRUSHES SIZE mm	2/205
VELOCITA' ROTAZIONE GIRI / MIN / BRUSHES SPEED RPM	210
PRESSIONE SPECIFICA / BRUSH PRESSURE	gr/cm 40
DEPRESSIONE COLONNA D'ACQUA MBAR / VAC CAPACITY	900 mmh 20
CAPACITA SOLUZIONE / CLEAR WATER CAPACITY	3 lt
CAPACITA' RECUPERO / RECOVERY TANK CAPACITY	5 lt
AUTONOMIA DI LAVORO TEORICA MASSIMA (PER VERSIONI A BATTERIA) / MAX WORKING TIME CAPACITY	1 h

Liten Compact Stark

"MIRA" is extremely small and compact that you can easily load this machine even in a small car.

Small but strong: Stainless steel chassis inox AISI 304 and the working width is 410 mm.

Only 3 liters of solution tank capacity, however a cleaning capacity of 100 square meters thanks to "eco" function that controls the distribution of water in timed manner.

13 Ah lithium-ion battery of 36 volts that allow you to get one hour of autonomy.

Essential machine for deep cleaning in small rooms and full of obstacles. Thanks to its articulate drawbar allows access under tables, furniture, shelves, etc.

Mira is also designed for application other than normal use as a scrubber drier: thanks to its squeegee that is liftable, and also to its weight and thus pressure on the ground, we can use it to de-waxing or polishing treatments, just like a single brush machine.

Applying different types of brushes or pad holder, this machine is really polyvalent. All this is possible due to the oversizing of the motors which ensures functionality and effectiveness is uncommon, but above all we made the variable brush rotation speed. (two 210 mm diameter counter-rotating brush). From 140 to 210 rpm.

"MIRA" är extremt liten och compact vilket gör att du lätt kan transportera maskinen i en mindre bil. Du lastar maskinen i en mindre bil.

Liten men stark: Rostfritt stål chassit inox AISI 304 Arbetsbredden är 410 mm.

Endast tre liter renvatten kapacitet, men en rengöring kapacitet på 100 kvadratmeter tack vare den "eko" funktion som kontrollerar fördelningen av vattnet.

Ett 13 Ah litiumjonbatteri på 36 volt som gör att du får en timmes drifttid.

En fantastisk maskin för djuprengöring i små rum och svåråtkomliga ytor..

Tack vare sin unika konstruktion skurar du med lätthet under bord, möbler, hyllor, etc.

Mira är också konstruerad för fler applikationer än vad en vanlig kombimaskin klarar av:

Tack vare att gummiskrapa kan lyftas, vikten och trycket mot golvet kan vi använda den för stripping av wax, lättskurning eller polering, precis som en vanlig singelskurmaskin.

Med olika typer av bortsar eller rondellhållare, är denna maskin verkligen allround.

Allt detta är möjligt tack vare den överdimensionering av motorerna som garanterar en funktionalitet och effektivitet utöver det vanliga, men framför allt beroende på den variabla borstrotationshastigheten.

(Två 210 mm motroterande borstar).

Från 140 till 210 varv per minut

Petite
Agile
Robuste

Kleine Agile Robuuste

La "MIRA" est extrêmement agile e assez petite pour être transporté et chargé dans le coffre de votre voiture.

Petite mais robuste: châssis en acier inox AISI 304 avec 410 mm de largeur de travail.

Les 3 litres de capacité du réservoir eau propre pour une surface a nettoyer de 100 m², grâce aussi a la fonction "Eco" qui gère la distribution de l'eau de manière temporisée.

Batterie au lithium ion de 13 Ah a 36 volts qui permet une autonomie de 1 heure.

Une machine indispensable pour le nettoyage de toute surface et pour les endroits plein d'obstacle et passages réduits. Grâce à son timon articulé qui permet d'accéder sous les tables, les meubles et les étagères etc.

La "MIRA" a été étudié aussi pour différents types d'application en dehors du nettoyage traditionnel:

Grâce au relevage du suceur ainsi que de son poids qui donne une bonne pression au sol, nous pouvons également faire des traitement sur les sols, comme dé-cirage, lustrage etc.

En y montant différent type de brosses ou disque pad, cette machine est très polyvalente. Tout cela est possible grâce au moteur de brosses qui sont surdimensionnés garantissent une fonctionnalité et une efficacité hors du commun.

Nous avons également la possibilité de diminué ou augmenté la vitesse de rotation des brosses en fonction de nos nécessités en allant de 140 à 210 tours par minute.

De Scrub-Pro-Mop is wendbaar en compact en laat zich gemakkelijk vervoeren. Zelfs in een personen auto.

Smal maar sterk: Roestvrij stalen chassis met een werkbreedte van 410 mm.

Met zijn 3 liter schoonwatertank kan de Scrub-Pro-Mop een oppervlakte van ca. 100 m² reinigen dankzij zijn waterbesparende "eco" functie.

De 13 Ah lithium-ion batterij van 36 volt is goed voor een autonomie van ca. 1 uur.

De Scrub-Pro-Mop is helemaal in zijn element in kleine ruimtes en op plaatsen daar waar een standaard schrobmachine niet bij kan komen. Dankzij zijn kogelgewricht wordt het een koud kunstje om onder obstakels zoals meubilair en werkbanken te reinigen.

Door het wisselen tussen borstels of padhouders is deze machine multifunctioneel inzetbaar en kan hij meer dan alleen schrobben en water opnemen. Dankzij de hefbaar zuigmond kunt u hem ook inzetten als éénschijfsmachine.
